***South Sky Technology Ltd. Signs Reseller Agreement to Promote and Sell
GDC's Full Line of Network Access Solutions***

Naugatuck, CT, January 31, 2005 -- General DataComm, Inc. (GNRD) announced today that it has finalized a Multinational Reseller agreement with South Sky Technology Ltd., a systems integrator of telecommunications and data networking products.

Headquartered in Wanchai, Hong Kong, South Sky Technologies will offer General DataComm's complete line of network access products in Hong Kong, Macau, Taiwan and China.

South Sky Technology Ltd. supplies, installs and delivers maintenance services on data communications and networking equipment to banking and financial institutions, government, carriers and service providers, public utilities and multinational companies.

"The addition of South Sky Technology Ltd. is part of our multinational sales and support, distributor expansion strategy based on recent requests for products and services in the region. South Sky Technology has already started offering our modem, DSL and multiplexer product lines," said George Best vice president for sales and marketing at General DataComm. "Our relationship with South Sky Technology allows us access to the worlds fastest growing market. We are pleased with South Sky's commitment to not only new opportunities but also existing GDC customers."

GDC's NEBS Level III Certified SpectraComm products, GDC's full line of InnovX[®] network access products and GDC's DSLware products, will allow South Sky Technology to offer integrated, network managed and secure solutions for both central office and customer premise environments.

About General DataComm

General DataComm, Inc., headquartered in Naugatuck, CT, is a world class, quality-driven company that delivers networking services and an array of access communications products that allow customers to bridge technologies, maximize their investments in existing voice and data networks, and transition to the newest network architectures in NEBS-compliant, government and enterprise environments.
